Christopher Wiley

CS 121 project reflection

After being able to complete this project, I was able to understand more about two dimensional arrays. I would not say I had any huge bumps or problems while making this. One thing I will say that help me with this was being able to go back and look at all the past programs that we have made in class to help me. One of the strengths that I would say that have when I came to making this is that I have made this program before in Python and I have programed in java before.
